## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, 16, 17, drawn to methods of isolating pluripotent cells, classified in class 435, subclass 366.
  - II. Claims 9-12, 16, 17, drawn to methods of isolating neuroblastic cells, classified in class 435, subclass 368.
  - III. Claims 13-17, drawn to methods of producing committed cells, classified in class 435, subclass 455.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions in Groups I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because the method of isolating the pluripotent differs in function and effect from the method of isolating neuroblastic cells which methods both differ from the method of producing cells committed to specific lineages. These methods each result in different cell products with different compositions which are used in different methods.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Kathleen Williams on September 5, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
